3. Write a list of courses you plan to enroll in before graduating from high school. (Current seniors: list any college courses, certifications, or training you will need to complete before entering the workforce.)

As a senior applying to college applications, I plan to double major in Computer Science and Business Administration. I will need to take these college courses: Data Structures and Algorithms, Discrete Math, Linear Algebra, Accounting, and Computer Organization and Architecture. Some useful certifications include: Meta Front-end and Full-stack Development Course, W3Cx Front-End Web Developer Professional Certificate, and AWS Certified Developer – Associate. However, I also need more experience creating coding projects and landing internships to get a job in software engineering.
